DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1, 2, 5-7, 9-17, 19-22, 24-28, 30-34, and 36-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Purcell et al (5,598,514) in view of Nishino et al (5,237,424) for the same reasons as set forth in Section 4 of the last office action, dated 4/1/08.

4. Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Purcell et al in view of Nishino et al for the same reasons as set forth in Section 11 of the previous office action, dated 7/31/07.

Response to Arguments

5. Applicant's arguments filed 7/1/08 have been fully considered but they are not persuasive. Applicant asserts on page 9 of the Remarks that Purcell et al fails to disclose the

4:2:0 format. However, lines 35-55 in col. 1 of Purcell et al discloses the concept of such common coding format under the MPEG standard.

Applicant also asserts on page 9 of the Remarks that Nishino et al fails to disclose interleaving samples but interleaving of blocks. However, it is noted that claim 1 of explicitly recites "block of current video data" and "data is stored in one continuous memory block".

Applicant further asserts that the references are not combinable as Nishino describes storage of video data on a magnetic tape. However, lines 12-34 in col. 1 of Purcell et al also discloses magnetic disks and tapes as common storage media for MPEG playback modes.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
